

# FOOD BANK & MEAL PROGRAMS WHEN TO BRING IN GOLDFINCH

Food programs scale when inventory, compliance, and reporting move together. GoldFinch ERP & Accounting is built specifically for food banks and meal services, with dedicated support for medically tailored meals. Bring in GoldFinch when...

## MEALS AND INGREDIENTS ARE REAL INVENTORY

Meals, kits, and ingredients must be tracked by lot, expiration, and usage—not spreadsheets or custom objects.

## AUDITS, RECALLS, OR FUNDER REPORTING MATTER

The organization must prove what was served, when, and under which program or grant.

## FINANCE CAN'T EXPLAIN TRUE PROGRAM COSTS

Costs need to be tracked by program, service, or funding source—without reconciliation gymnastics

## ACCESSIBILITY IS NON-NEGOTIABLE FOR INCLUSIVE TEAMS

Teams require screen-reader-friendly, inclusive systems—not fragile custom UIs.

## SALESFORCE IS EXPECTED TO BE THE SYSTEM OF RECORD

CRM, operations, and financials must live on one platform.

GoldFinch ERP unifies CRM, meal and ingredient inventory, traceability, and accounting in a single Salesforce-native system—so food banks can scale their impact with confidence

Bring in GoldFinch when food programs need accountability and traceability at scale.
